

# My life at secondary school

by

**Stan Ip (1D)**

I study at Buddhist Wong Fung Ling College. It is located in Causeway Bay, a commercial and shopping hub in Hong Kong. I feel quite happy to study in this secondary school.

Firstly, the school has many facilities. For example, there is a rooftop garden which is environmentally friendly. The tuck shop sells scrumptious and mouthwatering snacks. There is a science laboratory where we can do funny experiments. I like the science laboratory most because I want to learn interesting knowledge. How wonderful these school facilities are!

Secondly, there are many school clubs for me to choose from. This is so fun. I want to join many of these clubs, like Gardening Club, English Society, Science Club, and IT Club. I enjoy Science Club most because I can have fun.

Thirdly, my new classmates are sociable, adventurous and gentle. Although they're mostly good, one of them is a little bit arrogant. We know that he is too proud of his academic result. Despite this weakness, he is sometimes sensible and friendly.

Besides, our classroom is tidy and neat. But the others are much messier than ours. I am extremely excited to be on duty to clean the blackboard. The teachers know that our class can keep the classroom clean and tidy..

All in all, my secondary life is splendid and brilliant. I believe that I will be happy to study in this secondary school.
