

A Review on Two Gadgets

3D Karen Ng (31)

Today I am going to introduce two high-tech gadgets: MUSE Footwear and CIRCLE. I will show you the advantages and disadvantages of them. Moreover, I will share my opinion.

First of all, I will talk about MUSE Footwear. Well, this pair of shoes are special. It can play music because it has a built-in CD player. You may play your favourite songs while you are walking or running. You can do exercise and enjoy music at the same time. It can catch the attention of others for its cool design. However, nothing is perfect. This pair of trainers are heavy. You will feel tired after walking for a while. Also, the battery runs out fast and the price is expensive.

Another gadget that I want to introduce is CIRCLE. It is a heater, speaker and charger. You can charge your phone while listening to music. If you are thirsty, you can enjoy a cup of hot tea or coffee. This is really a kind of enjoyment. However, with its three functions, the battery also runs out fast. In addition, it is inconvenient to carry the gadget. If you spill your drink in it, it might cause electricity leakage and this can be dangerous.

In my opinion, gadgets make our lives more convenient and brilliant. However, every coin has two sides, and there is no exception for these two gadgets. Therefore, we should make the best use of their advantages and improve the disadvantages.
