

A Postcard from New York

by Martin Hong (1D)

Dear Mum,

How are you? You should not work too hard because health is most important. At the moment I'm travelling with my friends and writing this postcard on the observation deck at the 102nd floor of Empire State Building in New York.

The Empire State Building is a giant. It has 102 floors, and it is 381 meters tall. It is a very popular tourist spot – we queued for over four hours to get in! Standing on the observation deck, we were very much amazed by the spectacular view. We 'll take many photos and send them to you.

Yesterday, we went to see the Statue of Liberty. It is not only gigantic but also very tall - it is 93 meters from the ground to the torch of the Statue of Liberty. It was designed by Fridley August Butler Dee. I admire him very much because he could design such a beautiful and amazing statue. I couldn't help but take lots of photos with it.

Tomorrow, we plan to go to the Times Square. We'll go shopping at Times Square. I know it is a very crowded shopping centre. I'll buy some special souvenirs for you. I've taken lots of photos on this trip. I'll share them with you when I get back to Hong Kong.

Bye for now.

Martin
