

Proposal for the film shows

1. Introduction

We would like to put forward some ideas on the choice of genre for the film shows we are going to organize. In this proposal, we would discuss what type of films is most suitable, why it is suitable, and describe two examples of the film type and how students can relate to this type of films.

2. Reasons why fantasy is the most suitable genre for S3 students

We think fantasy is most suitable for S3 students because it is fun and entertaining. It includes some supernatural creatures, for example, monsters and super-powered heroes. Fantasy is often more visually engaging than reality. Teenagers are interested in fantasy because it takes them away from reality. They can leave their worries behind while being taken to an adventure. Furthermore, adolescence is the best period to develop creativity, and fantasy can stimulate teenagers' creativity.

3. Examples of Fantasy Films

3.1 Harry Potter

It is directed by Chris Columbus. This film talks about Harry Potter, a seemingly ordinary boy living with his hostile relatives, the Dursleys in Surrey. On his eleventh birthday, he learned from a mysterious stranger, Rubeus Hagrid, that he was actually a wizard, and that he was famous in the Wizard World for surviving an attack by the evil Lord Voldemort when he was only a baby. Voldemort killed his parents, but his attack on Harry rebounded, leaving only a lightning bolt scar on Harry's forehead and rendering Voldemort powerless. Hagrid revealed to Harry that he had been invited to attend Hogwarts School of Witchcraft and Wizardry. At Hogwarts, Harry began learning wizardry and also discovered more about his past and his parents.

3.2 Transformers

It is a sci-fi action fantasy directed by Fiona Davis. This film talks about the Autobots and Decepticons being space aliens. They wanted to get the Allspark from the Earth. The Autobots wanted the Allspark to stop war and maintain peace, whereas the Decepticons wanted the Allspark to govern the universe. One day, Ben met Bumblebee, who was a member of the Autobots, by accident. Ben and his girl friend helped the Autobots to fight against the Decepticons and get the Allspark. Finally, humans and the Autobots won, and the Earth and universe got back peace.

4 Relevance of fantasy to students' life

Students can relate to fantasy because it features magical effects and supernatural occurrences that may happen in our real world. For example, the touch-screen technology was once one of the magical effects of fantasy. Nevertheless, nowadays, touch-screen products can often be found in our daily life.

5 Conclusion

In conclusion, fantasy films stimulate viewers to think beyond reality and therefore they are most suitable for S3 students. I believe if we choose fantasy, we can attract many students to watch our film shows. We hope our proposal could be accepted.
