Presentation about my favourite TV programme

My favourite TV programme is “My Love from the Star”. It is a Korean television series about an alien (Do Min-joon) who landed on Earth four hundred years ago and fell in love with a top actress (Cheon Song-yi) in a modern city.

In recent years, K-pop and Korean sitcoms have been very famous in Asia. My family and friends are also their fans. Sometimes when I surf the Internet, I can see that there are lots of social websites, such as Twitter, Facebook and Tumblr discussing Korean artists and TV programmes. So, Korean music and TV programmes are really prevailing in Hong Kong.

There are two main characters in the TV series. Do Min-joon, who was very cold and distant from others, loved a girl who lived in the Joseon Dynasty four hundred years ago. The girl died because of an attempt to save him. He then stayed on earth until he could return home. He led a lonely and isolated life for centuries but one day he met Cheon Song-yi, who was at her young age. She looked exactly like the one he loved 400 years ago. In fact, she was a top pop star who was very impolite and believed that she was every man’s goddess. Then she met her stoic neighbor, Do Min-joon, and developed romantic feelings towards him and tried to make him fall for her.

I enjoy watching this TV drama because it is fun. Moreover, the plot is very touching and intriguing. In addition, the actors and actresses are impressive. The story is appealing and matches the background of the characters well.

I hope you enjoy listening to my presentation. Thank you.
