

Save Our Earth!

2A Jonas Mok

Do you always go shopping and buy a lot of clothes or things you don't actually need? Do you always use a product once and then throw it away? Do you always leave food in your plate when you finish eating?

If your answer to the above questions are “yes”, stop doing all these things now. They cause a lot of trash, as shown by this photo. This trash will make the air smells bad, and all of the trash in Hong Kong will be classified and once and for all transported to the three landfills in Hong Kong, but now all the landfills are nearly full, so we need to stop creating trash or our Earth will no longer be suitable for humans to live in.

In order to do this, we need to implement the 3R policy – reduce, reuse and recycle. In other words, we only buy things we need. We can reuse our unused things. For examples, we may use shoe boxes to keep our personal things. To support recycling, we can put bottles, tins and newspapers into the recycling bins all around Hong Kong. We can also donate the things we don't use anymore to others who are in need and don't waste them.

So take action now and encourage your friends and family members to do the same! It's not that hard. Let's save our Earth!
