

My Dream Job

My dream job is to become an entrepreneur for beauty products. Ever since I was small, I have been surrounded by my mum's cosmetic products and this is one of the reasons why I am so interested in beauty products.

Beauty products are not only about cosmetics, there are also different products such as those for skin, hair and body. My goal is to create my own brand of skincare products. Many young people are very worried about their skin. I want to help them overcome that feeling and make them feel confident about their appearance. For example, Kylie Jenner, a famous beauty entrepreneur, started her make-up line when she was only 19 years old. She was very insecure about having small lips and later she created her own lip kits and named it 'Kylie Cosmetics'. She has inspired lots of young people and helped them improve their appearance.

I think the best part of this job would be communicating with people. I have a friendly personality, most of my friends says. I'm used to talking with many people about their skin problems and I actually love doing it. Therefore, it wouldn't be a problem for me. Also, giving your fullest and feeling passionate about pursuing dreams give greater chance for success than failure. Besides, being able to take something that is just an idea or concept and make it come true as a product is the best part of being a beauty entrepreneur.

Moreover, the income is attractive. Beauty entrepreneur makes a big profit. For example, if you are working somewhere in the USA, the monthly salary can reach up to US\$9000 to US\$10000 or higher. In addition, if you have your own company there and it becomes a success, your net asset will be up to a million. With that money, I can repay my parents because they've always worked hard and for long hours for us.

An extremely important part for beauty entrepreneur is ensuring the highest standard of health and safety for people. For example, it is important to use appropriate ingredients in the products and assess the potential side effects it may bring.

After all, if I want to have this job, I have to study really hard for my public exams to enter the right university. I'm hoping that one day all my hard work will pay off.
