

To Pursue Financial Freedom

by Jacee Chen (6D)

I know that everyone has their own dream job, a career that they need to take one day, for example, becoming a doctor, actor and singer. As for me, I want to become an entrepreneur and run my own business. Since I was young, I have an idea of starting my own business and be my own boss, to supervise my whole company and staff. I think that being an entrepreneur can allow me to follow my dream and realize it. As I also want to see my plans grow from nothing and to become successful.

From a young age, I have been drawn to the concept of entrepreneur as my father has his own small business. I remembered going on an event with a small stall where I sold drinks like Coca-Cola, Sprite and other soft drinks with my auntie, when I was 9 years old. The joy of selling my product, earning money and engaging with customers ignited me a passion to start my own business. This experience taught me valuable lessons about marketing and the importance of perseverance.

I have wanted to become independent to gain control of my own future. Another reason why I wanted to become an entrepreneur is that this job gives me freedom and a flexible schedule. I could have more holiday and time to hang out with my family and friends as I'm the one who makes the work schedule. The best part of this job is that I can set my own goal and do projects I desire and contribute to the society. I could also earn lots of money from it and repay my parents. There may be uncertainty associated with starting a new entrepreneurship. Also, there is a high risk of failure and you are under pressure to make decisions with limited information.

I believe that I can overcome this problem because I have strong communication skills as I have worked hard on improving my public speaking. In order to achieve my goal, I will work hard and pursue a degree on BBA at university to provide me the knowledge of finance, marketing and management. I would also plan to seek internships when I get to college for more work experience and develop my social circle.

To conclude, I hope that my dream job as an entrepreneur will be achieved in the future and that I'll become a successful entrepreneur in society to serve the people.
