

My dream of getting rich
by Kenny Shi Wang Lam 6D

As I was a child, I wanted to become a policeman when I was watching TV. But later, I wanted to become a fireman, also because of TV programmes. Athletes, chief executive officers, teachers, even principals, were all of my dream jobs when I was a kid. But now, I have a serious goal: to become a businessman.

When I was a student, the heavy workload in my studies made me feel tired, and I didn't have a lot of time to do a part-time job. So, when I needed money to do things like eating lunch, going to places, or buying something I needed, I had to ask my parents for help. But for me, I felt ashamed of this. Every time I saw people post photos of their lives on social media, I was jealous of them. At that time, a voice appeared in my mind: 'They can be rich, why can't I?' So, I am very interested in becoming a businessman, to earn big money. I want to have my own industry, company, or business that brings me wealth. If I achieve success in my business, my parents will be proud of me. Then, they will not need to work anymore; we will have lots of money to enjoy the wonderful world that we may have never seen before.

When I thought about my dream job, I realised that it would be hard to achieve. So, I decided to work hard to build the foundation for my future business. I started to find some books about economics and investment. I haven't decided which industry I should enter as it is still early days. However, I believe that I will absolutely find the best way to pursue my goal. Until that day comes, I will prepare myself and accumulate the necessary economic knowledge.

For my plan to become a successful businessman, I will work for a company to gain experience for some years. During this time, I will save enough money to support myself in starting my own business. Being a businessman is my dream job; I want to get rich and have more money to enjoy the world with my family. Even though this job is probably full of risks, I think it will be worth it!
