

### The Alien Attack

There were two astronauts named Rey and Yuri, who were best friends. Their mission was to explore outside of Earth. They were in the control room of their spaceship while they chatted happily about interesting facts and stories about space and world-famous astronauts.

Suddenly, the engine of the spaceship started heating up with smoke coming out. Realising that the spaceship had broken down, they got really nervous and started panicking.

Then, their panel malfunctioned and smoke came out of the panel. Feeling confused and hopeless, they were about to accept their fate of staying in space forever.

As soon as they were about to give up, a UFO came out of nowhere and floated on top of their spaceship and shot a light beam down onto Yuri and Rey. Blinded by the sudden brightness, they shut their eyes tightly.

Suddenly, they heard a weird voice speaking in an unknown language and immediately opened their eyes again to find an alien which appeared in front of them. Yuri's eyes widened in shock before asking, "An alien? Aren't aliens only from fantasy stories?" she asked while examining the alien closer. Seeing their confused faces, the alien continued speaking in his weird language while holding his hand out, a sign for Yuri and Rey to follow him. Hesitating whether to follow the alien or not, they glanced at each other before giving in and following the alien up into his UFO.

Rey and Yuri explored in the UFO and were fascinated by everything inside which they only saw in fantasy stories.

Not long after their ride in the UFO, the UFO landed back on Earth. The alien saved both Yuri and Rey from staying in space forever. Yuri and Rey thanked the alien before it went back into his UFO. It quickly disappeared into the sky and back into space again.
