### S.1 Project Learning

Project Learning Day is one of the most meaningful activities of the year. Students worked extremely hard to prepare for their BIG DAY! From script writing, music composing to costumes designing, students had to apply multiple skill sets learned from different subjects. Let's take a look at their amazing performances on the presentation day.

### S2 & S.3 Project Learning

S.2 and S.3 project learning is more challenging as they have to study the consumer culture and science in our everyday life. Under the supervision of their mentoring teachers, each group selected an interesting topic, investigate and share their findings on the final presentation day. The experience is truly rewarding.

S.3 NCS students work with local students for their science project.

S.2 topic is to investigate consumer culture.

The school year has come to an end! Wish all of you are having a fun and meaningful school year. This is the perfect time to look back and reflect on the great moments.

This year, school life is great. I'm new to Hong Kong and I'm still trying to fit in the city, but one thing for sure is that if one doesn't speak Cantonese, he will have a little chance of succeeding in Hong Kong. I'm looking forward to learning more Cantonese.
